Yogesh Gahlawat

Java | Spring Boot | React.js | Full Stack Developer

+91 8813024892 | yogeshgahlawat2425@gmail.com | LinkedIn | GitHub | LeetCode

Professional Summary

Full Stack Developer with 3+ years of experience developing enterprise financial trading applications at Tata Consultancy Services. Experienced in Java, Spring Boot, REST APIs, React.js, Next.js, TypeScript, and Redux Toolkit. Hands-on experience with layered backend architecture, Oracle Database, Spring Data JPA, Redis caching, Redis Streams, asynchronous processing, and frontend performance optimization. Comfortable working across application, API, caching, streaming, and persistence layers in collaborative delivery environments.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++
Spring Ecosystem: Spring Framework, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring Boot Actuator, Transaction, Validations, Testing, IoC Containers, DI, Controller–Service–Repository architecture
React Ecosystem: React.js, Next.js(Page/App Routing), Redux Toolkit, Redux Thunk, React Hooks, Custom Hooks, Context API
Frontend: HTML, CSS, Bootstrap, Tailwind, SCSS
Databases: Oracle, MySQL, SQLite
Caching and Streaming: Redis, Redis Streams, Apache Kafka
Version Control: git CMD, github, gitlab
DEV Tools: VS Code, Postman, Swagger
Deployment:NGINX, CI/CD
Architecture and Performance: Layered architecture, component-based architecture, event-driven architecture, scalability, high availability, React.memo, useMemo, useCallback, lazy loading, dynamic imports, code splitting

Professional Experience

Tata Consultancy Services (TCS) — **Sep 2023 – Present**

System Engineer | Full Stack Development

CCIL Bond Forward Trading Platform

Enterprise financial trading application

Financial trading platform supporting Bond Forward and Forward Rate Agreement (FRA) workflows involving government securities(G-Sec, SDL), enabling trade processing and access to transaction data across interbank and client market segments.

- Developed responsive trading interfaces and workflow-driven screens using React.js, Next.js, and TypeScript.
- Implemented frontend state management using Redux Toolkit and Redux Thunk, and created custom hooks for shared application logic, API communication, and form handling.
- Developed Spring Boot REST APIs using Controller-Service-Repository architecture, implementing business logic, request validation, and trading-data retrieval.
- Integrated Spring Data JPA with Oracle Database for data persistence and transactional operations, working with SQL queries and database performance optimization.
- Implemented Redis caching with TTL, cache-aside patterns, and cache-invalidation strategies to improve access to frequently requested reference data and reduce repeated database reads.
- Built producer-consumer workflows using Redis Streams to enable asynchronous event processing and separate background tasks from synchronous API requests.
- Improved frontend rendering and loading performance using React.memo, useMemo, useCallback, lazy loading, dynamic imports, and code splitting.
- Participated in code reviews, integration debugging, and production support, using Git, GitLab, Postman, and Swagger throughout development and testing.

CCIL ASTROID Trading Platform

Enterprise financial trading and processing application

Electronic, anonymous order-matching platform for Rupee Interest Rate Swaps (IRS), supporting MIBOR OIS, Modified MIFOR, and interest-rate swap spread trading. Facilitates price discovery, order execution, and straight-through processing for central clearing.

- Contributed to the development and maintenance of the ASTROID electronic trading platform for Rupee Interest Rate Swaps (IRS), supporting trading workflows and order processing.
- Worked with C++ for backend application functionality and processing within the trading platform.
- Developed and maintained Oracle PL/SQL components to support database operations, trading-data processing, and retrieval.

- Worked with IBM MQ for message-based data transmission between application components and integrated systems.
- Supported integration between application logic, database operations, and messaging workflows to facilitate reliable data exchange.
- Investigated defects, troubleshot application issues, and collaborated with team members on code changes, testing, and production support.

Education

Master of Computer Applications (MCA) Aug 2019 – Aug 2022
Amity University, Noida

Bachelor of Computer Applications (BCA) Aug 2016 – Aug 2019
Hindu Institute of Management, Sonipat

Certification

Information Security Awareness – Protecting the Information
